

## WO PROFESSIONAL SERVICES

### IT & Technical Services

Just as important as implementation, training, and cost, companies must consider how to host their new software. Choosing to host the software in-house can leave IT teams isolated to troubleshoot an unfamiliar product.

Confidently manage WideOrbit software on company infrastructure with the assistance of WideOrbit's Professional Services team. Clear, thorough experts answer questions, provide helpful resources, and assist in executing projects like server migration, database tuning, disaster recovery, networking, and virtualization.

#### BENEFITS

##### Full control

Easily access, monitor, and maintain software with in-house infrastructure.

##### Expert back-up

Master hardware and software issues with expert-level knowledge and insight.

##### Improved efficiency

Speed project time without keeping all required personnel on staff full-time.

#### IT ASSISTANCE FOR YOUR UNIQUE NEEDS

Backup & Mirroring • Database Refreshes • Database & Server Monitoring • Disaster Recovery  
Server Migrations • Server Setup • Service Setup • Networking Setup & Monitoring
