WIDEORBIT Say Hello to a Wider World™

WIDEORBIT PROFESSIONAL SERVICES

IT and technical services

Choosing how to host new software is just as important as implementation, training, and cost considerations. Hosting software in-house can leave IT teams isolated to troubleshoot an unfamiliar product.

WideOrbit's Professional Services team can help you confidently manage WideOrbit software on company infrastructure. Our knowledgeable experts will thoroughly answer questions, provide helpful resources, and assist in executing projects such as server migration, database tuning, disaster recovery, networking, and virtualization.

Benefits

Full control
Easily access, monitor, and maintain software with in-house infrastructure.

Expert back-up
Master hardware and software issues with expert knowledge and insight.

Improved efficiency
Speed project time without the need to keep all required personnel on staff full-time.

IT assistance for your unique needs

Backup and Mirroring | Database Refreshes | Database and Server Monitoring | Disaster Recovery
Server Migrations | Server Setup | Service Setup | Networking Setup and Monitoring
